

Payments to the National Business Center

Science Support	FY 2000 Estimate	Uncontrol. & Related Changes	Program Changes	FY 2001 Budget Request	Change from FY 2000
Payments to the National Business Center	7,483	⁽¹⁾ -6,507	0	976	-6,507

¹ These funds were transferred during FY 2000 by the requirements of Secretary Order establishing the National Business Center.

Current Program Highlights

The Department's National Business Center (NBC) provides efficient and cost effective standardized electronic-based administrative systems and ADP services to USGS. The funds provide management and support services related to the Federal Financial System (FFS), Fixed Assets and Inventory Subsystem, Interior Department Electronic Acquisition System (IDEAS), and the Procurement Data Reporting System.

In FY 2001, in response to Secretarial Order establishing the National Business Center, funds appropriated to the Reston branch of the National Business Center were transferred to other Bureaus within the Department of the Interior in relation to the direct appropriation required to defray support costs. The transfer of \$6.5 million responds to the requirements contained in the Secretarial Order, which among other things consolidated all three former Administrative Centers (Washington, Reston and Denver) into one National Business Center, operated within the Office of the Secretary.
