I will make contact with Admiral Allen folks. The CG has been most helpful in the USGS calculation in getting numbers for burnibg, skimming.

I agree re taking steps to convene a call. Marcia: you might do this by emailing the uscg folks whom than Allen copied on his email this morning.

Subject: some clarifications

Folks-

Everyone has been informed of the fact that Marcia is the lead for DOI on the FRTG. They will not schedule anything or make any decisions without including her. I have also tried to clarify the existence of a meeting with the Group prior to the NRT. There is no meeting scheduled outside of the NRT call for tomorrow.

Right now, there seems to be a gap between Marcia's huge efforts and the group's substantive understanding of where things were heading. I guess given that, I would offer a suggestion that you might want to consider simply convening the FRTG for a call tomorrow morning yourselves. You are the lead and I believe they would be delighted to get the opportunity to convene, discuss, and ultimately support you.
