I'm quite willing to come on in if there is any need. I will need help getting in the building as my ID is not initialized for MIB.

Vic

Anne,

I replied to you before I got in my car to come to MIB. I am here and see on my BBY that it did not go thru. I'm very sorry.

Ref your question below, I have no visibility into any of the current FRTG subteam meetings or timelines, need to defer to Dr. McNutt on any of those questions.

I am writing to ask if I should completely cancel the 4PM mtg or if Dr. McNutt wanted to use the Interior Operations Center and call-in number to speak with the people I notified; those who were with us in the room Thursday @ 3PM. (Not sure about NOAA, tho)

I did not want to notify everyone and then try again later to reconvene that group.

I think we have up until 2:45 or 3 PM to cancel it outright. Unless Captain White emailed everyone (but I hadn't seen that).

Please advise. Thank you
jim

Jim, please inquire of the FRTG about the status of the work and any conference calls or meetings. Marcia is the lead on this and needs to be in the loop if they're getting together. We need to know what the team is doing.

Just learned from NIC that the special NRT was cancelled, but tech team may meet today. In another thread, Dir McNutt said that decision is pending a noon telecon. (CDT, EDT?)

I shouldn't email all DOI invitees from other thread until I hear for sure what has been planned for the afternoon.

jim's blackberry

Anne, has there been a final decision on conducting the 4 pm teleconference?

Thx, Larry
