Catherine,

The Mass Balance Sub-Team was pulled together so late that it is not included in this timeline, so I have no direct comment. The status of Mass Balance is that a 1-2 page summary describing what was included in the accounting is nearing a final draft and will hopefully go into internal USGS review today for the intended release as a USGS Open File Report released. This is to be coordinated through Julie Rodriguez. A report on the Mass Balance exercise can hopefully be prepared and reviewed in the timeframe established for the Plume Team. We started pretty late but we are working to catch up.

Subject: revised FRTG time line

Please review the new FRTG time line. It shows the sliding due dates pending resolution of the funding issue.

If this slips past 30 May will be pushing back the deadline.

We never gave the Coast Guard a firm due date on this, but if it's going to be much later than the end of June we'll need to notify them.

Please send any comments that you may have.
