Subject: Effects of Building a Sand Barrier Berm to Mitigate the Effects of the Deepwater Horizon Oil Spill on Louisiana Marshes

---

The subject report has been approved for publication as U.S. Geological Survey Open-File Report 2010-1108. Bureau approval has been documented in the report tracking system under IPDS number IP-022083.

The report has been reviewed for technical and editorial clarity and for adherence with the Survey's Fundamental Science Practices policy. Qualified technical peers as well as in-line supervisory management and an editor from the Raleigh Publishing Service Center have examined the technical content and presentation of material. All reviewers have provided good, sound feedback and helpful suggestions, which have improved the overall clarity and organization of the technical presentation. All reviewer comments and questions have been satisfactorily addressed, and appropriate revisions have been made where necessary.

If you have any questions regarding this review or I can be of any further assistance, please contact me at 703-648-4329 or krankin@usgs.gov.
