

Developing a USGS Science Impact Office

How can a Science Impact Office be designed so that it is sustainable?

- How can it be effectively linked with ongoing USGS science programs?
- What steps are necessary to ensure that a Science Impact Office is integrated into the USGS mainstream?
- What performance measures should be established to evaluate whether a Science Impact Office successfully enhances the use and value of science?

Resources:

- Science Impact concept paper – dated April 4, 2002
- Draft proposal to establish a Science Impact Office – dated May 8, 2003

Please note that the draft proposal is a work in progress and has not been approved.
