Understanding the Disease:

Science in Support of One Health

***Friday, November 20, 2015
11:00 a.m***

***Rayburn B-338
Washington, D.C.***

Seven out of ten emerging human diseases originate in wildlife or domestic animals. Scientists are therefore advancing a concept of integrated wildlife, domestic animal, human and environmental health—One Health. But wild animals don't come in for regular check-ups, so the USGS and its partners are working to understand the dynamics among these factors. Come learn how we are striving to meet the challenges of avian influenza, white-nose syndrome, plague and other threats to our natural resources and our well-being.

Speakers

Jeremy Coleman
U.S. Fish and Wildlife Service

Thomas DeLiberto
USDA APHIS

Dr. Jill Rolland
U.S. Geological Survey

Larry Voyles
Arizona Game & Fish Department

Host
Bat Conservation International
