

YOU ARE INVITED TO A BRIEFING ON

GROUNDWATER

A CRITICAL RESOURCE FOR OUR NATION

Groundwater is the source of drinking water for nearly 50% of the U.S. population. Increased use of groundwater resources for domestic, agricultural, industrial, and environmental needs has led to uncertainty concerning the ability of systems to meet current and future demands. Come learn about why groundwater is a critical resource for the Nation, and see how **USGS** is working with partners to assess, monitor and quantify the availability and sustainability of the Nation's groundwater resources.

Friday, July 27, 2012 at 10:00 a.m.

1334 Longworth House Office Building, Washington, D.C.

A repeat of this briefing will be held at 2 p.m. in Dirksen 366

Sponsored by:

Congressman Lamborn and **Congresswoman McCollum**

Speakers:

Bill Cunningham Acting Chief, Office of Groundwater, U.S. Geological Survey

Kevin Rein Deputy State Engineer, Colorado Division of Water Resources

Robert Schreiber Vice President at CDM Smith, representing American Society of Civil Engineers

Emcee:

Christine Reimer Government Affairs Director, National Ground Water Association

Morning refreshments provided courtesy of National Ground Water Association
