**Friday, September 13 at 10:00 am
2325 Rayburn House Office Building
Washington, DC**

Hosted by:

American Water Works Association

Refreshments will be provided.

Growing populations, increased energy development, and the uncertain effects of a changing climate magnify the need for an improved understanding of water use and water availability. Presently, no comprehensive national assessment of water resources exists. Come learn how the USGS and its partners are making progress towards a National Water Census, which will thoroughly quantify water supply and demand across the entire country.
